

EMIRATES AGROFISH FERTILIZER

HEAT TREATED

Agrofish fertilizer is natural biological fertilizer produced from fish powder. It contains 60% total proteins and 10-12% essential nutrients. Agrofish fertilizer is enriched with sea weeds, beneficial bacteria such as Azotobacter and phosphate solubilising bacteria which enhances the availability of phosphorus to the plants.

Agrofish Fertilizer

- Enriches Soil.
- Enhances root and vegetative growth.
- Increases yield at least 10-15%.
- Results in increased flowering and budding.
- Source for major and minor plant nutrients.
- Rich source for beneficial bacteria to the soil.
- Recommended in organic gardening, capable of acting as reservoir for plant food.
- increased usage of **AGROFISH** fertilizer helps the gardener to reduce levels of synthetic chemicals that may be detrimental to human health and environment.

Emirates Bio Fertilizer Factory is at your service with a professional team for manufacturing high quality products, with well equipped laboratories for quality control, quality assurance and product development. We always provide you the best. Emirates Bio Fertilizer Factory provides both fertilizer and it's experience to the farms directly.
